Q. No.		CO
Unit – 3		
Continuous & Lifelong Learning, Team Working Skills & Collaboration		
01.	What is a characteristic of the accelerated change in the technology landscape?	CO 2
	a) Increased connectivity	
	b) Slower development of technologies	
	c) Reduced innovation speed	
	d) Minimal market competition	
02.	Which of the following is an example of a disruption caused by technological advancement?	CO 2
	a) Ride-sharing apps replacing taxi services	
	b) Creation of traditional business models	
	c) Longer life cycles of devices	
	d) Increase in face-to-face communication	
03.	Why do shorter life cycles of technologies lead to increased e-waste?	CO 2
	a) Because frequent upgrades make older devices obsolete	
	b) Because people store old devices for long periods	
	c) Because there is a decrease in the production of electronic devices	
	d) Because technological improvements reduce device functionality	
04.	What drives high levels of competition in technology markets?	CO 2
	a) Constant innovation by companies	
	b) Reduced consumer demand	

	c)	Limited technological innovation	
	d)	Longer time between product releases	
05.	A company plans to release a new smartphone model annually to stay competitive. Which characteristic of the technology landscape does this strategy address?		CO 2
	a)	High competition	
	b)	Reduced R&D investment	
	c)	Increased e-waste	
	d)	Longer technology life cycles	
06.	A new gaming console was recently launched, and its predecessor quickly became obsolete. This is an example of:		CO 2
	a)	Frequent upgrades	
	b)	Economic pressure	
	c)	Increased connectivity	
	d)	Job transformation	
07.	How does the rapid evolution of technology impact job markets?		CO 2
	a)	It leads to the creation of new jobs and elimination of old ones	
	b)	It limits the demand for innovation	
	c)	It stabilizes job roles over time	
	d)	It reduces the need for technological education	
08.	Which of the following best illustrates the impact of consumer demand in a rapidly changing technology landscape?		CO 2
	a)	High demand for advanced AI in communication	
	b)	Reduction in device costs over time	
	c)	Steady demand for older technological devices	
	d)	Limited interest in frequent upgrades	
09.	Which impact of accelerated technological change could most negatively affect the environment?		CO 2
	a)	Increased e-waste	
	b)	Job transformation	
	c)	Increased connectivity	
	d)	Economic growth	
10.	Which of the following strategies is most important for businesses to address shorter technology life cycles?		CO 2
	a)	Continuous innovation and product upgrades	
	b)	Investing heavily in customer service	
	c)	Limiting research and development	
	d)	Reducing production to avoid competition	

11.	Why is it important to keep up with technological advances?		CO 2
	a)	To remain competitive in the job market	
	b)	To avoid learning new skills	
	c)	To increase traditional marketing knowledge	
	d)	To maintain job roles without changes	
12.	Which of the following is an example of career advancement through continuous learning?		CO 2
	a)	Acquiring project management skills to qualify for leadership positions	
	b)	Avoiding career shifts by staying in one role	
	c)	Transitioning to a non-technical role	
	d)	Learning a new language for personal satisfaction	
13.	How does learning digital marketing contribute to economic resilience?		CO 2
	a)	It mitigates the risk of job loss due to shifts in traditional marketing	
	b)	It helps avoid technological change	
	c)	It limits flexibility in changing environments	
	d)	It reduces personal growth needs	
14.	Why is adaptability important in a rapidly changing work environment?		CO 2
	a)	To transition between roles or industries when needed	
	b)	To specialize in outdated skills	
	c)	To stay in a single industry	
	d)	To avoid switching roles	
15.	A marketing professional learns coding to transition into a tech-related role. This is an example of:		CO 2
	a)	Adaptability	
	b)	Personal growth	
	c)	Job security	
	d)	Economic resilience	
16.	A software engineer enrolls in artificial intelligence courses to keep up with industry innovation. This reflects which of the following?		CO 2
	a)	Keeping up with technological advances	
	b)	Reducing their skill set	
	c)	Career stagnation	
	d)	Decreasing employability	
17.	What is the relationship between continuous learning and job security in the context of economic resilience?		CO 2

	a)	Continuous learning helps mitigate the risks of job loss due to automation	
	b)	Continuous learning focuses only on personal satisfaction	
	c)	Continuous learning reduces the need for career advancement	
	d)	Continuous learning decreases the ability to adapt to new roles	
18.	A professional who learns project management skills to qualify for leadership roles is prioritizing:		CO 2
	a)	Career advancement	
	b)	Economic resilience	
	c)	Flexibility in changing environments	
	d)	Personal growth	
19.	Which of the following is the most important reason for continuous learning in an ever-changing job market?		CO 2
	a)	To ensure adaptability and job security	
	b)	To avoid switching careers	
	c)	To increase social interaction	
	d)	To limit skill development to one field	
20.	Learning new skills for self-improvement primarily focuses on:		CO 2
	a)	Personal growth	
	b)	Career advancement	
	c)	Economic resilience	
	d)	Avoiding innovation	
21.	What is the first step in continuous learning?		CO 2
	a)	Identify learning goals	
	b)	Join professional networks	
	c)	Seek feedback from peers	
	d)	Apply skills practically	
22.	Which of the following is an example of utilizing online resources for continuous learning?		CO 2
	a)	Taking an online course in machine learning on Coursera	
	b)	Joining a mentoring program	
	c)	Reading the latest publications on fintech	
	d)	Attending a cybersecurity conference	
23.	Why is setting clear objectives important in continuous learning?		CO 2
	a)	To determine which skills are needed and why	
	b)	To limit the need for practical application	
	c)	To reduce the need for feedback and reflection	

	d)	To avoid networking opportunities	
24.	How can reading books and articles contribute to continuous learning?		CO 2
	a)	It keeps individuals updated on the latest trends and developments in their field	
	b)	It allows participation in professional workshops	
	c)	It helps avoid practical application of skills	
	d)	It replaces the need for attending seminars and events	
25.	A professional joins a LinkedIn group focused on artificial intelligence and seeks guidance from an expert. This is an example of:		CO 2
	a)	Joining professional networks	
	b)	Practical application	
	c)	Utilizing online resources	
	d)	Setting learning goals	
26.	After learning web development through an online course, a student creates a personal website to practice their skills. This is an example of:		CO 2
	a)	Hands-on practice	
	b)	Identifying learning goals	
	c)	Seeking feedback and reflection	
	d)	Attending workshops and seminars	
27.	What is the connection between practical application and continuous improvement in learning?		CO 2
	a)	Hands-on practice allows for real-world application, while feedback helps refine and improve skills	
	b)	Continuous improvement can replace the need for setting learning goals	
	c)	Practical application prevents the need for continuous improvement	
	d)	Practical application is unnecessary if feedback is provided	
28.	If someone attends an industry-specific seminar and reads relevant journals afterward, which two strategies for continuous learning are they utilizing?		CO 2
	a)	Attending workshops and reading books and articles	
	b)	Setting learning goals and joining professional networks	
	c)	Utilizing online resources and continuous reflection	
	d)	Practical application and seeking feedback	
29.	Which strategy for continuous learning is most effective for keeping up with rapid changes in a technical field?		CO 2
	a)	Reading the latest publications and articles	
	b)	Setting broad, non-specific learning goals	

	c)	Avoiding workshops to focus on independent learning	
	d)	Engaging in informal networking rather than structured professional networks	
30.	A professional who sets clear learning objectives and actively seeks feedback on their progress is likely to:		CO 2
	a)	Achieve more targeted and continuous improvement in their skills	
	b)	Minimize the need for practical application	
	c)	Become over-reliant on online resources	
	d)	Avoid professional development events	
31.	What is teamwork?		CO 2
	a)	Collaborative effort to work together towards a common goal	
	b)	Independent effort to achieve personal goals	
	c)	Avoiding collaboration to work more efficiently	
	d)	Sharing only individual successes	
32.	Which skill is essential for ensuring clear and effective exchange of ideas in a team?		CO 2
	a)	Communication	
	b)	Conflict resolution	
	c)	Listening	
	d)	Flexibility	
33.	Why is listening an important aspect of teamwork?		CO 2
	a)	It helps understand and consider others' perspectives and feedback	
	b)	It limits communication within the team	
	c)	It allows team members to work independently	
	d)	It reduces the need for conflict resolution	
34.	How does flexibility contribute to teamwork?		CO 2
	a)	By taking on different roles and tasks as needed	
	b)	By avoiding changes in the project	
	c)	By enforcing a strict division of responsibilities	
	d)	By eliminating the need for task division	
35.	During a brainstorming session, a team member suggests a solution that no one else considered. This is an example of:		CO 2
	a)	Innovation	
	b)	Conflict resolution	
	c)	Communication failure	
	d)	Ignoring feedback	

36.	A project manager divides tasks among team members based on their strengths. This practice improves the team's:		CO 2
	a)	Efficiency	
	b)	Flexibility	
	c)	Networking	
	d)	Conflict management	
37.	What is the relationship between teamwork and networking in the context of career success?		CO 2
	a)	Teamwork encourages networking by building professional relationships that expand opportunities	
	b)	Networking allows team members to isolate themselves	
	c)	Networking and teamwork are unrelated in career development	
	d)	Teamwork hinders the development of professional relationships	
38.	How can conflict resolution contribute to the success of a team?		CO 2
	a)	By constructively addressing disagreements to maintain team harmony	
	b)	By discouraging open discussions about challenges	
	c)	By allowing unresolved conflicts to persist	
	d)	By avoiding any communication about disagreements	
39.	Which skill is most crucial in maintaining effective collaboration within a team that faces frequent changes in roles and tasks?		CO 2
	a)	Flexibility	
	b)	Innovation	
	c)	Conflict resolution	
	d)	Networking	
40.	A team achieves its goal more efficiently through shared knowledge and collaboration. Which of the following best explains the importance of collaboration in this scenario?		CO 2
	a)	Shared knowledge and pooled efforts lead to more effective goal achievement	
	b)	Team members should focus on independent work to increase efficiency	
	c)	Collaboration limits the need for communication	
	d)	Conflict resolution is unnecessary when collaboration exists	
41.	Which trait is essential for ensuring that responsibilities are consistently met in a team?		CO 2
	a)	Reliability	
	b)	Proactivity	
	c)	Adaptability	
	d)	Respect	

42.	What does adaptability in teamwork refer to?		CO 2
	a)	Being flexible and open to changes	
	b)	Taking initiative and offering help	
	c)	Acknowledging team members' contributions	
	d)	Completing tasks on time	
43.	Why is respect important in teamwork?		CO 2
	a)	It values and appreciates the contributions of others, fostering a positive team environment	
	b)	It prevents team members from contributing ideas	
	c)	It ensures deadlines are met consistently	
	d)	It limits the need for collaboration	
44.	How does proactivity benefit a team?		CO 2
	a)	It encourages taking initiative and offering help to team members without being asked	
	b)	It ensures team members focus only on their own tasks	
	c)	It limits communication between team members	
	d)	It allows team members to wait for instructions before helping others	
45.	A team member sees that another colleague is struggling to meet a deadline. The team member steps in to help, ensuring the project stays on track. This is an example of:		CO 2
	a)	Proactivity	
	b)	Adaptability	
	c)	Conflict management	
	d)	Reliability	
46.	In a team meeting, one member provides clear and constructive feedback to improve the team's work. This is an example of:		CO 2
	a)	Effective communication	
	b)	Respect	
	c)	Continuous learning	
	d)	Collaboration	
47.	Which two traits or actions combined are likely to prevent delays in a team project?		CO 2
	a)	Reliability and proactivity	
	b)	Reliability and conflict management	
	c)	Collaboration and continuous learning	
	d)	Respect and adaptability	

48.	If a team member listens actively during a disagreement and helps find a compromise, they are demonstrating which teamwork skill?		CO 2
	a)	Conflict management	
	b)	Proactivity	
	c)	Adaptability	
	d)	Respect	
49.	A team member regularly attends workshops to improve their skills, which then helps the team's progress. This establishes:		CO 2
	a)	Continuous learning	
	b)	Proactivity	
	c)	Conflict resolution	
	d)	Adaptability	
50.	Which combination of traits is most likely to foster a productive team environment where all members feel valued and motivated?		CO 2
	a)	Respect and collaboration	
	b)	Respect and conflict management	
	c)	Reliability and proactivity	
	d)	Proactivity and adaptability
